

## Casting and Splinting Products - Splinting Systems

### 3M™ Scotchcast™ Conformable Splint

#### Description

A ready-to-use, highly conformable splint made of layered fiberglass and pre-padded with water-repellent felt for quicker drying. Prepackaged in a variety of sizes to meet application needs.

#### Product Benefits

- Low-profile, one-sided felt padding is less bulky so it molds more easily to the patient for a closer, more conformable fit.
- All-in-one splint eliminates the need for splint assembly for easy application and time savings. Faster application increases patient turnaround.
- Hypoallergenic, water-repellent felt padding dries much more quickly than standard padding for less water against patient's skin and reduced chance of maceration.
- Provides strong, lightweight support in minutes to encourage early patient mobility.
- Priced comparably to fiberglass roll splints and faster to apply than plaster or roll splints for greater cost effectiveness.
- Less messy than plaster splints for easy application and faster cleanup.

#### Suggested Applications

- For use in the construction of common orthopedic splints
